

SHUBHAM HARIYALE

Leicester, UK (Open to Relocation) | +44 07554519948 | shubham,hariyale.uk@gmail.com | [LinkedIn](#) | [GitHub](#) | [portfolio](#)

PROFESSIONAL SUMMARY

Graduate Software Engineer with over one year of commercial experience developing and supporting production software applications using **C#, .NET, ASP.NET Core, ASP.NET Web API, SQL Server, REST APIs, and backend engineering**. Recently completed an **MSc Advanced Computer Science (Distinction)** from the University of Leicester.

Experienced throughout the Software Development Life Cycle (SDLC), including requirements analysis, backend development, API design, database optimisation, debugging, testing, deployment, and production support. Skilled in developing scalable backend services, optimising SQL performance, troubleshooting production issues, and collaborating within Agile Scrum teams.

Passionate about building reliable cloud-based applications, continuously learning modern software engineering practices, and solving real-world business problems.

TECHNICAL SKILLS

- **Programming Languages:** C#, SQL, JavaScript, Python
- **Backend Development:** .NET, ASP.NET Core, ASP.NET Web API, REST APIs, Microsoft OData, MVC, Layered Architecture, API Integration
- **Databases:** SQL Server, Relational Database Design, Database Normalisation, Stored Procedures, Indexing, Query Optimisation, Transactions, ACID Principles
- **Cloud & DevOps:** Azure Fundamentals, AWS S3, Docker (Basic), CI/CD Concepts, GitHub Actions (Basic)
- **API Development & Testing:** REST APIs, Swagger/OpenAPI, Postman
- **Software Engineering:** Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC), Agile/Scrum, Debugging, Troubleshooting, Root Cause Analysis, Production Support
- **Frontend:** HTML5, CSS3, JavaScript, React (Fundamentals)
- **Tools:** Visual Studio, SQL Server Management Studio (SSMS), Git, GitHub

PROFESSIONAL EXPERIENCE

Software Developer (.NET) | Osiya Tech – Indore, India | April 2023 – August 2024

- Developed and maintained production software applications using **C#, ASP.NET Core, ASP.NET Web API, SQL Server, and REST APIs**.
- Designed and implemented scalable backend services supporting business-critical workflows and system integrations.
- Developed RESTful APIs and documented endpoints using **Swagger/OpenAPI**, validating functionality through **Postman**.
- Implemented **Microsoft OData** endpoints supporting filtering, sorting, pagination, and efficient data retrieval.
- Integrated **AWS S3** for secure file storage and document management within web applications. *(Only keep this if it's exactly what you implemented.)*
- Designed relational database schemas, stored procedures, indexes, and optimised SQL queries to improve application performance.
- Investigated production issues through debugging, troubleshooting, and root cause analysis across both application and database layers.
- Collaborated within Agile Scrum teams throughout requirements analysis, development, testing, deployment, and production support.
- Used Git for version control and collaborative software development.

PROJECTS

Stock Control System (MSc Dissertation Project)

Technologies: C#, ASP.NET, SQL Server

- Designed and developed a secure inventory management system supporting stock management, reporting, and user administration.
- Implemented Role-Based Access Control (RBAC), authentication, authorisation, and RESTful API endpoints.
- Designed relational database schemas, stored procedures, indexes, and optimised SQL queries.
- Applied Object-Oriented Programming principles, layered architecture, and software engineering best practices.
- Performed testing, debugging, validation, and deployment throughout the project lifecycle.

Business Website (Production System) | [Livesite](#)

Technologies: ASP.NET Core, SQL Server, JavaScript

- Designed, developed, deployed, and maintained a live production website.
- Developed responsive interfaces using HTML, CSS, and JavaScript.
- Built backend business functionality using ASP.NET Core and SQL Server.
- Managed production deployments, bug fixes, and ongoing application improvements.

EDUCATION

- **MSc Advanced Computer Science (Distinction) | University of Leicester, UK | Jan 2025 – Jun 2026**
Relevant Areas: Artificial Intelligence, Software Engineering, Data Systems, Systems Design, Cyber Security, Algorithms & Data Structures
- **MBA – Marketing & Business Analytics | D.A.V.V. University, India | 2021 – 2023**
- **BSc Computer Science | D.A.V.V. University, India | 2018 – 2021**

CERTIFICATIONS

Leicester Virtual Internship Programme | University of Leicester / Practera (2026)

- Conducted research, analysis, and recommendation development for a real-world client project.
- Collaborated within a multidisciplinary team to solve business challenges.
- Developed communication, teamwork, analytical thinking, and problem-solving skills

ADDITIONAL INFORMATION

- Eligible for Graduate Route Visa
- Available immediately
- Open to relocation throughout the UK
- Strong interest in backend engineering, cloud computing, distributed systems, and modern software development.
